

Agrimonia gryposepala

Tall Agrimony

The delicate arching stems with yellowish white flowers work well in masses or as subtle accents. Found in woodlands as well as more open sites, this plant tolerates a range of soil and moisture conditions. Can be used to lighten a dark shady corner.

Suggested companions: moonseed (*Menispermum canadense*), Pennsylvania sedge (*Carex pensylvanica*), Canada Mayflower (*Maianthemum canadense*), bottlebrush grass (*Hystrix patula*)
